

# Chemical Blending Conveniently in West Texas.

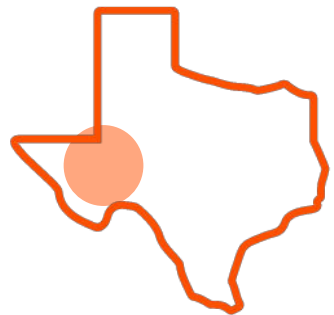

Ramón  
Plant Operator

## About us.

**West Texas Blending** offers businesses in oil & gas, water management, and agricultural services quick, full-service **chemical blending capabilities**.

We are able to rapidly and economically generate your specific chemical formulations because of our **tried-and-true procedures and knowledgeable staff**.

We provide comprehensive manufacturing, storage and packaging services to support **small and large batch demands**.

# West Texas: A Hub for a Diverse Growing Economy

Oil & Gas

Agriculture

Environmental

## Strategic Logistics Hub.

West Texas offers major highways, rail lines, and distribution centers, ensuring **efficient and cost-effective delivery** of blended chemicals across industries.

## Operational Efficiency.

Operating in a less congested region allows for **faster production, streamlined logistics, and adaptable supply chain solutions** compared to larger metro areas.

## Industrial Growth & Support.

Its **expanding industrial base** supports chemical blending, equipment manufacturing, and materials processing for industries like oil & gas, construction, automotive, and coatings.

## Skilled Workforce.

Odessa has an experienced workforce in chemical handling, blending, and logistics, **ensuring precision and quality control for specialized industries.**

# Odessa.

## Our Strategic Location.

# The Value of our Location.

## Shorter Transportation times.

West Texas proximity to production areas makes it an ideal staging location, ensuring efficient logistics for Texas manufacturing hubs.

## Improved Supply chain reliability.

Minimized risks by blending closer to the source.  
Strengthened logistics efficiency.

## Cost Savings

Lower transportation costs.  
Optimized logistics = better bottom line.

## Reduced Carbon Footprint.

Decreased transportation emissions contribute to your sustainability goals.

CERTIFIED

## High-Precision Blends

We deliver precise, consistent blends that meet your specifications.

José  
Plant Operator

## Built on decades of expertise.

Our team brings more than 70 years of experience in chemical and petroleum engineering, we have worked with Fortune 500 companies in the manufacturing, R&D and Oil & Gas Industry.

# Comprehensive Chemical Solutions.

# Production Site Specs

**14 acres**, fully fenced with controlled access.

2×6000 gallon conical blend tanks.

65,000 gallon stainless steel tank storage capacity.

Room to grow.

**RO system** with over 5,000 gallon per day production capacity.

40,000 gallons of RO water storage capacity.

Diaphragm pumps, magnetic drive pumps.

Electric air compressor.

Diesel air compressor.

12,000 lb lift capacity telehandler.

Welding equipment.

**Willing to invest in your particular project.**

We have produced **over 1.25 million gallons** of blended products in the last 12 months.
